

Please do not implement any proposals that would lessen the Indiana Telephone Privacy law protections. This law has been very effective in the reduction of unwanted phone calls.

Since placing my name on the attorney General's list I have not received unwanted phone calls. At one time I was receiving 3-5 per evening. Now I am receiving none. It is a pleaseure to answer the phone and know that whomever is calling is someone you want to speak with instead of someone selling magazines, credit cards or long distance phone service.

This law is important because it allows Indiana residents to participate in a law that directly benefits them every day. This law does what it was meant to do, protect and serve people; please don't remove the protection.

Sincerely,
Bobbi Doyle
